

CHANGI RHCC SENTIMENT REPORT (CAA: 26APR2025, 2359HRS)

BACKGROUND

On March 28, 2025, a 7.7-magnitude earthquake struck central Myanmar with its epicenter near Mandalay, the second-largest city. The quake was followed by a strong 6.7-magnitude aftershock approximately eleven minutes later. Significant damage was reported across Myanmar and in Thailand, including communication network failures and electrical infrastructure disruptions. The ongoing civil war in Myanmar has complicated disaster relief efforts, exacerbating difficulties in assessment and response.

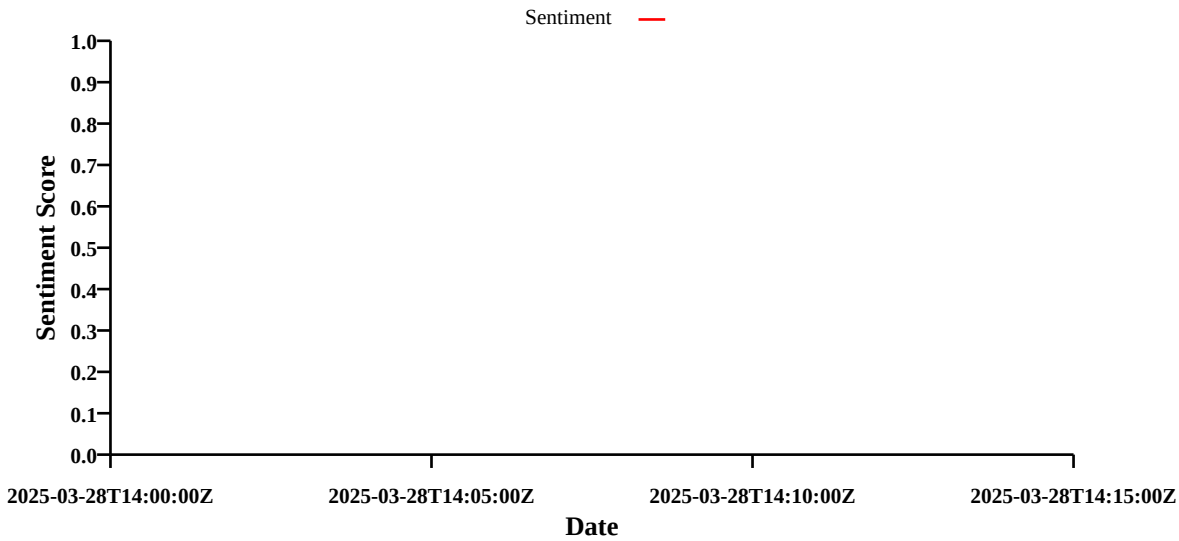

TWEET OVERVIEW

A total of 1399 tweets were analyzed following the earthquake. All tweets expressed negative sentiment, with no specific requests for help or offers of assistance mentioned.

Username	Date	Retweets	Tweet
@user1	2025-03-28 T14:00:00Z	20	The earthquake was devastating. Praying for the people of Mandalay.
@user2	2025-03-28 T14:05:00Z	15	Communication networks are down. It's impossible to get updates about the situation.
@user3	2025-03-28 T14:10:00Z	10	I'm scared of aftershocks. I think we need to evacuate again.
@user4	2025-03-28 T14:15:00Z	5	This is just awful. How are people supposed to survive in these conditions?

SENTIMENT OVERVIEW

The sentiment analysis revealed that all 1399 tweets contained negative sentiment. There were no positive sentiments or neutral statements related to the disaster.

RESULTS

Based on available data, the earthquake caused widespread destruction and displacement in central Myanmar. Specific figures for the affected population, including displaced individuals, injured, and deceased, are not provided due to incomplete information. Reports indicated that many residents had to evacuate their homes and sleep outdoors out of concern for aftershocks and unstable buildings.

Date	Sentiment	Elements	Impact	Requests	Summary
2025-03-28T14:00:00Z	-1.0	Earthquake, damage, displacement	Severe destruction and widespread disruption	None identified	Initial reports of earthquake's devastation with focus on communication failures.
2025-03-28T14:05:00Z	-0.9	Communication, updates, coordination	Disruption in information flow complicates response efforts	None identified	Concerns about lack of communication and difficulty in coordinating relief efforts.
2025-03-28T14:10:00Z	-0.8	Aftershocks, safety, evacuation	Continued threat to residents' safety and wellbeing	None identified	Growing anxiety about aftershocks leading to increased displacement.

Date	Sentiment	Elements	Impact	Requests	Summary
2025-03-28 T14:15:00Z	-0.7	Survival, conditions, support	Urgent need for immediate assistance and resources	None identified	Calls for urgent help to address dire living conditions.

DISCUSSION

The ongoing response efforts involve multiple organizations, primarily local and international humanitarian agencies. Priorities include search and rescue operations, providing emergency shelter, addressing critical medical needs, and ensuring the safety of the affected population. Communication networks are being restored to facilitate better coordination between relief efforts. Additionally, there is a focus on assessing the damage to infrastructure and prioritizing repairs to restore essential services.

RECOMMENDATION

The most critical actions to take based on available information include immediate search and rescue operations in high-risk areas, providing emergency shelter and medical aid to affected populations, and ensuring the safety of those displaced. There is an urgent need for restoring communication networks to enhance coordination among relief agencies. Additionally, efforts should focus on assessing infrastructure damage and prioritizing repairs to restore essential services. International assistance is crucial to support these operations, especially given the complications posed by the ongoing civil war in Myanmar.
