

CHANGI RHCC SENTIMENT REPORT (CAA: 29APR2025, 2359HRS)

BACKGROUND

On March 28, 2025, a significant 7.7-magnitude earthquake struck central Myanmar, with its epicenter near Mandalay, the country's second-largest city. The quake was followed by a strong 6.7-magnitude aftershock approximately eleven minutes later. The disaster caused widespread damage across Myanmar and Thailand, affecting communication networks and electrical infrastructure. Many residents were forced to evacuate their homes due to fears of aftershocks and unstable buildings. In Thailand, Bangkok was declared an emergency area, with mass transit systems temporarily closed.

TWEET OVERVIEW

The tweet dataset analyzed contains 2049 tweets. The overwhelming majority (2032) express neutral sentiment, reflecting the current state of information sharing and concern among users. There are only 8 positive tweets and 9 negative tweets. All tweets include requests for help, with a specific emphasis on medical assistance.

[illegible]

SENTIMENT OVERVIEW

The average sentiment score across all tweets is 0.50, indicating a neutral overall tone. The numerical scores range from 0 (negative) to 1 (positive). The distribution of sentiments is as follows: 8 positive tweets, 2032 neutral tweets, and 9 negative tweets. Sentiment trends over time show a consistent level of concern and urgency without significant shifts in emotional response. The main themes identified in the data are requests for help, particularly medical assistance, with users sharing their experiences and seeking information on safety measures.

RESULTS

The affected population includes individuals who are displaced, injured, and deceased. The earthquake has caused widespread displacement, with many residents forced to evacuate their homes due to structural damage and aftershock risks. Injured individuals require immediate medical attention, and the death toll is currently unknown but expected to rise as rescue efforts continue. The data indicates a high demand for humanitarian assistance and disaster relief.

Date	Sentiment	Elements	Impact	Requests	Summary
28/03/2025	0.51	Earthquake, Floods, Storm, Cold, Weather Related, Electricity	Missing People, Infrastructure Related, Shops, Aid Centers	Request, Offer, Aid Related, Medical Products, Military, Other Aid	On March 28, 2025, social media activity during a disaster event was characterized by a neutral overall sentiment score of 0.51, with 28 tweets rec...

DISCUSSION

Ongoing response efforts involve multiple organizations, including local governments, international aid agencies, and non-governmental organizations (NGOs). Priorities include search and rescue operations, providing medical care to the injured, ensuring food and water supplies, and addressing the needs of displaced populations. The situation is expected to evolve over the coming days as rescue teams continue their work and additional information becomes available. Coordination among response agencies will be crucial to ensure an effective and efficient relief effort.

RECOMMENDATION

Based on the available information, critical actions include prioritizing search and rescue operations in affected areas, providing immediate medical assistance to injured individuals, ensuring access to food and water for displaced populations, and coordinating efforts among local authorities and international aid organizations. Additionally, there is a need for continuous monitoring of aftershock activity and early warning systems to protect the population from further risks. Public information campaigns should focus on safety measures and provide updates on relief efforts to manage public expectations and reduce panic.
