

CHANGI RHCC SENTIMENT REPORT (CAA: 29APR2025, 2359HRS)

BACKGROUND

On March 28, 2025, Myanmar experienced a devastating earthquake with a magnitude of 7.3 on the Richter scale. The epicenter was located near the Sagaing Fault, one of the largest sources of earthquakes in the country. The quake struck during Friday prayer hours, causing widespread destruction and loss of life. In Myanmar, up to 5,352 people were killed, with an additional 11,400 injured and hundreds more missing. The ongoing civil war has complicated disaster relief efforts, exacerbating the difficulty in reaching affected areas. In Thailand, 72 people died and over 8,300 buildings, including mosques, monasteries, nunneries, and pagodas were destroyed. The earthquake also caused significant damage in Vietnam and Bangladesh, highlighting the region's vulnerability to seismic activity.

TWEET OVERVIEW

The tweet dataset contains 2049 tweets related to the earthquake. These tweets predominantly request help and medical assistance, reflecting the urgent need for aid in the affected areas. There are no notable influential personnel or characters mentioned in the tweets.

SENTIMENT OVERVIEW

The sentiment analysis of the tweets reveals a predominantly neutral sentiment (2029 tweets), with only 11 positive tweets and 9 negative tweets. The average sentiment score is 0.50 on a scale from 0 to 1, where 0 represents negative sentiment and 1 represents positive sentiment. The overwhelming majority of tweets express concern and request for help, indicating the severity of the situation. There are no significant trends over time in the sentiment scores, as the disaster has already occurred and is current news.

RESULTS

The earthquake affected a large population, with up to 5,352 deceased individuals in Myanmar and 72 in Thailand. The injured population numbers around 11,400, while hundreds more are reported missing. The destruction of religious buildings, including mosques, monasteries, nunneries, and pagodas, has had a significant impact on the cultural heritage of the affected regions. The ongoing civil war in Myanmar has further complicated rescue and relief efforts.

DISCUSSION

The response to the earthquake involves multiple organizations, including international aid agencies, local governments, and non-governmental organizations (NGOs). Priorities include search and rescue operations, medical assistance, provision of food and water, and temporary shelter for displaced individuals. The ongoing civil war in Myanmar poses significant challenges to these efforts, as access to affected areas is limited. In the coming days, there will likely be a focus on stabilizing the situation, providing immediate aid, and planning long-term recovery strategies. The international community will continue to support relief efforts, with a particular emphasis on addressing the needs of displaced populations and restoring essential services.

RECOMMENDATION

The most critical actions to take include intensifying search and rescue operations in affected areas, particularly focusing on remote and conflict-affected regions. Immediate medical assistance should be provided to the injured population, with a focus on trauma care and disease prevention. Temporary shelters should be established for displaced individuals, ensuring access to food, water, and sanitation. Long-term recovery efforts should prioritize rebuilding infrastructure, restoring essential services, and addressing the needs of vulnerable populations, including children and the elderly. Additionally, there is a need to strengthen early warning systems and improve disaster preparedness measures in the region to mitigate future impacts.
